ESWAR RAVITEJA RAYAVARAPU

INFRASTRUCTURE & CLOUD TRANSFORMATION TECHNICAL PROJECT MANAGER

Jersey City, NJ | eswar.rayavarapu23@gmail.com | +1(551) 804-3753 | Linkedin

---

SUMMARY

Technical Project Manager with over 10 years of experience leading large-scale cloud migration and infrastructure transformation programs across telecom and enterprise environments. Proven expertise in managing end-to-end AWS migration initiatives, including legacy application modernization, OSS/BSS platform alignment, and hybrid cloud deployments. Strong track record of delivering multi-wave migration programs with minimal disruption, driving cross-functional collaboration across network, infrastructure, application, and security teams. Experienced in AWS public cloud project delivery, including planning, execution, risk management, and performance optimization, ensuring alignment with business and client objectives.

CORE COMPETENCIES

Program Management (Large-Scale Cloud Transformation)
AWS Cloud Migration (Legacy → AWS / Hybrid Cloud)
SDLC Methodologies (Agile, Waterfall, Hybrid)
Telecom Systems (OSS/BSS Platforms)
Migration Planning & Cutover Execution
Infrastructure & Application Modernization
Dependency Discovery & System Interoperability
Program Governance (RAID, Risk, Compliance)
Cross-Functional Leadership (Network, Infra, Security, Apps)
Change Management & Release Control
Stakeholder & Executive Communication
Operational Readiness & Post-Migration Stability
Infrastructure Cost Optimization & Financial Tracking

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, VPC, CloudWatch, Migration Hub), Azure (VMs, Storage, NSG)
Infrastructure: Linux (RHEL, SLES, CentOS), VMware vSphere, High Availability, Disaster Recovery
Databases: Oracle, MS SQL Server, DB2 (familiarity), AWS RDS, Aurora, Dynamo DB
Migration Tools: AWS MGN(CloudEndure), AWS DMS, AWS Migration Hub, , DataSync, Snow Family, MAP
Telecom: OSS/BSS Systems, Service Delivery Platforms, Network Infrastructure Integration
Programming: Python (Pandas, NumPy, Scikit-learn, Streamlit), SQL, Bash (Shell Scripting)
Tools: Power BI, Advanced Excel, JIRA, Confluence, ServiceNow, MS Project, Visio, Git
AI Technologies: LangChain, RAG, Vector Databases (ChromaDB), Ollama, Model Validation

PROFESSIONAL EXPERIENCE

Community Dreams Foundation *Remote (USA) | Dec 2025 – Present*

Technical Project Manager

- Leading development of RenewSight-AI, an AI-powered predictive analytics and decision support platform leveraging data modeling and intelligent insights generation.
- Defining system architecture including data pipelines, model workflows, and AI-driven recommendation logic.

- Collaborating with engineering teams on AI model integration, data processing, and output validation strategies.
- Driving end-to-end delivery from ideation to deployment readiness using Agile methodologies.
- Translating stakeholder needs into AI/ML solution requirements including model evaluation, performance metrics, and scalability considerations.
- Building reporting frameworks and dashboards to monitor system effectiveness and business impact.

Savvy Global Technologies *Remote (USA) | July 2025 – Nov 2025*

Technical Project Manager | AI Innovation Program

- Led cross-functional engineering teams delivering AI-driven automation and analytics initiatives.
- Coordinated machine learning lifecycle activities including experimentation tracking, validation checkpoints, and deployment readiness.
- Improved delivery timelines by approximately 20% through sprint restructuring and dependency mitigation.
- Developed executive dashboards translating model outputs into operational insights for leadership stakeholders.

DXC Technology (EIT Services India Pvt Ltd) *India | Feb 2020 – Dec 2023*

Technical Project Manager | Cloud Infrastructure Programs

- Directed enterprise infrastructure modernization programs supporting 1000+ Linux servers across hybrid cloud environments (AWS and on-prem data centers).
- Led multi-wave cloud migration programs (Data Center → AWS) using CloudEndure, coordinating infrastructure, application, and platform teams across global delivery locations.
- Managed end-to-end SDLC and infrastructure migration lifecycle including scope definition, migration wave planning, risk management, dependency analysis, and production cutover execution.
- Coordinated cross-functional engineering teams (~40 resources) including developers, infrastructure engineers, platform specialists, and operations teams across discovery, validation, and deployment phases.
- Served as the primary bridge between business stakeholders, client leadership, and engineering teams, providing status reporting, risk visibility, and delivery alignment.
- Implemented RAID governance frameworks, executive dashboards, and program reporting processes improving delivery transparency and schedule predictability.
- Oversaw release readiness, change management, and production stability ensuring migration validation, rollback preparedness, and performance benchmarks during cutover activities.
- Drove 15–20% infrastructure cost optimization through migration sequencing, platform consolidation, and workload rationalization strategies.
- Leveraged Universal Discovery for dependency mapping and migration readiness assessment supporting accurate wave planning and risk mitigation.
- Developed detailed project plans, schedules, & budgets ensuring timely delivery of AWS cloud migration programs.
- Monitored project performance metrics and conducted post-migration reviews to drive continuous improvement and optimization.
- Managed project budgets, financial tracking, and cost governance ensuring alignment with business objectives.
- Captured lessons learned through spring retrospectives post-deployment to improve future migration strategies.
- Built Power BI executive dashboards enabling leadership to monitor migration progress, risks, and operational KPIs.

ADECCO Global *India | May 2019 – Jan 2020*

Sr. Linux Migration Engineer **|** HPI Tattoo Beyond Migration

- Executed large-scale infrastructure migration activities supporting enterprise and telecom environments.
- Performed migration readiness assessments, validation, and rollback planning for controlled execution.
- Supported replication-based migrations using VMware and Carbonite tools.

Ericsson India Global Services *India | Jun 2017 – Nov 2018*

Solution Integrator | T-Mobile SDG Platform

- Supported telecom OSS/BSS platform operations including upgrades, patching, and service delivery enhancements.
- Coordinated UAT validation and ensured system readiness across telecom service environments.
- Managed deployments and production releases ensuring service continuity and system stability.

Huawei Technologies India *India | Oct 2016 – May 2017*

Sr. Technical Engineer | MTN SA Service Delivery Platform

- Led telecom service onboarding and integration within OSS/BSS-driven service delivery platforms.
- Performed system validation, performance tuning, and production issue resolution.
- Conducted root cause analysis for critical telecom service disruptions.

Tata Teleservices Ltd *India | Jun 2013 – Oct 2016*

Technical Engineer | TATA SDP, Device Management & DSTK Platform

- Administered Linux environments supporting telecom service delivery platforms.
- Implemented monitoring solutions using SNMP and CACTI to improve infrastructure visibility.
- Automated operational tasks using shell scripting improving operational efficiency.

APPLIED AI PROJECTS:

- *Retrieval-Augmented Generation (RAG) System:* Designed a locally hosted RAG pipeline using Python, ChromaDB, LangChain, and Ollama including document ingestion, embeddings, vector indexing, and retrieval orchestration.

- *Hybrid Forecasting & Decision Support Model:* Built hybrid forecasting workflow integrating time-series models with prioritization rules and dashboard visualization for operational decision-making.

CERTIFICATIONS

Certified Scrum Master (Scrum Alliance)
SAFe Scrum Master (SSM)
AWS Solution Architect Associate – *In progress*
Microsoft AZ-900
Oracle OCI Foundations

EDUCATION

Master of Science **–** Information Systems, *Stevens Institute of Technology*
Bachelor of Technology **–** Electronics & Communication Engineering**,** *Aditya Engineering College, JNTUK*
