SUMMARY

Technical Program Manager with 10+ years of experience delivering enterprise cloud migration and infrastructure transformation programs across telecom and global environments. Led multi-wave AWS and Azure initiatives with structured governance, dependency mapping, and executive reporting.

Experienced in delivering production AI initiatives and designing applied AI systems including Retrieval-Augmented Generation (RAG) pipelines and hybrid forecasting workflows. Brings strong execution discipline across scope, risk, delivery assurance, and stakeholder alignment.

TECHNICAL SKILLS

AI & GenAI: RAG Architecture, Vector Databases (ChromaDB), LLM Workflow Orchestration, LangChain, LangGraph, Ollama (Local LLM), Prompt Guardrails, Model Validation & Evaluation Oversight

Programming: Python (Pandas, NumPy, Scikit-learn, Streamlit), SQL, Bash

Cloud & Infrastructure: AWS (EC2, S3, IAM, VPC, CloudWatch, CloudEndure), Azure (VMs, Storage, NSG), VMware vSphere, Linux (RHEL, SLES, CentOS), High Availability (HA), Disaster Recovery (DR)

Program Governance: Technical Program Management, PMBOK, Agile/Scrum, DXC Catalyst, MS Project, WBS, RAID Logs, Budgeting, Change Management, Executive Reporting

Analytics & Tools: Power BI, Advanced Excel, Git, JIRA, Confluence, Streamlit

PROFESSIONAL EXPERIENCE

Community Dreams Foundation *Remote (USA) | Dec 2025 – Present*

Volunteer Project Manager

- Lead planning and coordination of community-focused initiatives within a registered nonprofit organization.
- Manage task allocation, milestone tracking, and stakeholder communication.
- Structure volunteer workflows and documentation to improve operational clarity.
- Define impact metrics and reporting for program tracking.

Savvy Global Technologies *Remote (USA) | July 2025 – Nov 2025*

Technical Project Manager | AI Innovation Program

- Led cross-functional AI teams delivering a production AI/ML initiative.
- Coordinated ML lifecycle activities including experimentation tracking, validation checkpoints, and deployment readiness.
- Improved delivery timelines by 20% (measured) through sprint restructuring and dependency mitigation.
- Developed executive dashboards translating model outputs into delivery insights.

DXC Technology (EIT Services India Pvt Ltd) *India | Feb 2020 – Dec 2023*

Technical Project Manager | Cloud & Infrastructure Programs

- Directed multi-wave AWS and Azure cloud migration programs across large enterprise server(1K+) environments.
- Managed program budgets and coordinated global engineering teams across discovery, migration, validation, and cutover phases.
- Drove 15–20% infrastructure cost optimization through migration sequencing.
- Established RAID governance improving schedule predictability.

- Deployed Universal Discovery tools for dependency identification.
- Built Power BI dashboards improving executive visibility.

ADECCO Global *India | May 2019 – Jan 2020*

Sr. Linux Migration Engineer **|** HPI Tattoo Beyond Migration

- Executed enterprise Linux migrations using VMware vSphere Replication and Carbonite Double-Take.
- Conducted readiness checks, rollback planning, and post-migration validation.

Ericsson India Global Services *India | Jun 2017 – Nov 2018*

Solution Integrator | T-Mobile SDG Platform

- Managed production upgrades, patch rollouts, and SSL/TLS renewals.
- Coordinated UAT validation and risk-controlled releases.

Huawei Technologies India *India | Oct 2016 – May 2017*

Sr. Technical Engineer | MTN SA Service Delivery Platform

- Led service onboarding and deployments in telecom environments.
- Conducted performance validation and root cause analysis.

Tata Teleservices Ltd *India | Jun 2013 – Oct 2016*

Technical Engineer | TATA SDP, Device Management & DSTK Platform

- Implemented CACTI monitoring using SNMP.
- Administered Linux platforms and automated operational tasks using shell scripting.

SELECTED AI PROJECTS:

Retrieval-Augmented Generation (RAG) System

- Designed a locally hosted RAG pipeline using Python, ChromaDB, and Ollama.
- Built ingestion workflow (document parsing, chunking, embeddings, vector indexing, retrieval orchestration).
- Implemented strict grounding logic including refusal handling and citation validation.

Hybrid Forecasting & Decision Support Model

- Architected a hybrid forecasting workflow integrating time-series models and prioritization rules.
- Delivered interpretable outputs for operational decision-making.
- Deployed a dashboard interface to visualize forecasts and performance metrics.

EDUCATION

Master of Science in Information Systems **–** *Stevens Institute of Technology, Hoboken, NJ*

Bachelor of Technology in Electronics & Communication Engineering – *Aditya Engineering College, JNTUK*

CERTIFICATIONS

Certified Scrum Master (Scrum Alliance) | SAFe SSM | Microsoft AZ-900 | Oracle OCI Foundations

AWARDS & RECOGNITION

- DELIVER Award (DXC) – Cloud migration execution, AT&T Kings Mountain.
- DXC CHAMPS Award – Cross-team program leadership.
- Wall of Fame – Containerization & automation excellence.
