SUMMARY

Project Manager with 10+ years of experience delivering cloud migration, infrastructure modernization, and AI/ML program management across telecom, insurance, and enterprise environments. Proven success driving scope, budget, schedule, and risk governance using PMBOK, Agile, and DXC Catalyst frameworks. Successfully managed multiple large-scale, multi-region programs with full ownership of delivery assurance and stakeholder alignment. Strong background in AWS, Azure, Linux, and data-driven decision frameworks supporting clients including AT&T, Workforce Resilience, DIRECTV, and Downer.

CORE SKILLS

Project & Program Management: PMBOK, DXC Catalyst, MS Project, WBS, Critical Path, RAID Logs, Risk Mitigation, Budgeting & Forecasting, Cost Control, Scope & Change Management, Delivery Assurance, Governance & Compliance, Executive Reporting, Resource Planning

Cloud & Infrastructure: AWS (EC2, S3, IAM, VPC, Cloud Endure, CloudWatch), Azure (VMs, Storage, NSG), VMware vSphere, Linux (RHEL, SLES, CentOS), High Availability (HA), Disaster Recovery (DR) Planning, Infrastructure Discovery (UD, ADEPT, PMATT)

AI/ML & Data: ML Lifecycle, Data Preprocessing, Model Evaluation (Accuracy, Precision, Recall, F1), Bias Mitigation, Dashboarding

Networking & Systems: Network Planning, SDLC Optimization, Load Balancing, Performance Monitoring, System Design

Analytics & Tooling: Python, SQL, Power BI, Excel (Advanced), Git, JIRA, Confluence, Reporting Automation

Soft Skills: Client Management, Leadership, Negotiation, Strategic Thinking, Communication, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Savvy Global Technologies *Remote (USA) | July 2025 – Nov 2025*

Project Manager | AI Innovation Program

- Led cross-functional teams (AI analysts, data scientists, engineers, stakeholders) to define goals, scope, timelines, and deliverables.
- Oversaw data workflows including collection, cleansing, preprocessing, and feature readiness for ML modeling.
- Managed AI/ML lifecycle activities including experimentation, training, evaluation (accuracy, precision, recall, F1), validation, and deployment readiness.
- Delivered dashboards and performance insights to leadership, enabling data-driven decisions.
- Coordinated AI/ML market research and integrated technology trends into product roadmaps.
- Evaluated ethical risks and algorithmic bias; drove mitigation strategies and documentation.
- Maintained comprehensive documentation for reproducibility and audit readiness.
- Translated complex model outputs into actionable recommendations for business teams.
- Managed schedules, risks, and dependencies across AI projects using Agile/hybrid models.
- Supported deployment teams with acceptance criteria, validation, and monitoring plans.

Achievement: Accelerated AI project delivery timelines by 20% through improved coordination, clearer data workflows, and optimized sprint planning.

DXC Technology (EIT Services India Pvt Ltd) *India | Feb 2020 – Dec 2023*

Technical Project Manager | Cloud & Infrastructure Programs

Key Programs: AT&T, Work Force Resilience (formerly ISOS), Direct TV, Astro, Downer

- Led multi-wave cloud migration programs (1,000–4,000+ servers) across AWS/Azure using PMBOK and DXC Catalyst.
- Managed program budgets ~$2M–$5M and coordinated delivery across 20–40 global engineers and architects.
- Built and maintained schedules, WBS, dependencies, and critical paths in MS Project.
- Owned forecasting, budget tracking, financial variance analysis, and reporting.
- Served as primary liaison to client PMOs; managed expectations, SOW, and change control.
- Created RAID logs and mitigation plans, reducing delays by 30%.
- Delivered executive dashboards and KPIs in Power BI, cutting reporting cycles by 60%.
- Guided AWS architecture integration (EC2, S3, IAM, VPC, Cloud Endure).

- Collaborated with Delivery Assurance on governance, quality gates, and readiness.
- Contributed to proposals and solutioning for cloud migration opportunities.

Insurance Domain - Workforce Resilience / International SOS

- Managed modernization of insurance assistance platforms, strengthening uptime, DR, and compliance.
- Standardized migration playbooks for claims and emergency response systems.

Achievements:

- Delivered 0% downtime migrations for AT&T & Workforce Resilience.
- Enabled 20% cost savings by optimizing infrastructure footprints and migration sequencing.
- Reduced manual discovery workload by 70% through automation using UD, PMATT, ADEPT.

ADECCO Global *India | May 2019 – Jan 2020*

Sr. Linux Migration Engineer | HPI Tattoo Beyond Migration

- Executed enterprise Linux server migrations using VMware vSphere and Double-Take.
- Validated post-migration performance, networking, and system integrity across production workloads.

Achievements:

- Zero-downtime migrations for high-priority applications, improving deployment reliability by 30%.

Ericsson India Global Services *India | Jun 2017 – Nov 2018*

Solution Integrator | T-Mobile SDG Platform

- Managed production deployments, UAT cycles, and platform upgrades across telecom gateways.
- Strengthened system stability by implementing early SSL/TLS upgrades and platform hardening.

Achievements:

- Reduced production incidents by 25% through proactive validation and patching.

Huawei Technologies India *India | Oct 2016 – May 2017*

Sr. Technical Engineer | MTN SA Service Delivery Platform

- Led deployment, configuration, and performance validation for high-availability telecom platforms.
- Partnered with QA and architecture teams to refine defects and improve release quality.

Achievements:

- Increased platform uptime and minimized post-release issues through early defect detection.

Tata Teleservices Ltd *India | Jun 2013 – Oct 2016*

Assistant Manager & Technical Engineer | TATA SDP, Device Management & DSTK Platform

- Managed system upgrades, network configurations, SLA monitoring, and application integrations.
- Automated maintenance operations using shell scripting and cron frameworks.

Achievements:

- Improved reliability by 40% through performance tuning, reduced manual operational work by 50% with script automation.

EDUCATION

Stevens Institute of Technology, Hoboken, NJ **– *M.S in Information Systems*** (Jan 2024 – May 2025), GPA: 3.9/4.0
Aditya Engineering College, JNTUK – ***B.S in Electronics & Communication Engineering*** (May 2013)

CERTIFICATIONS

Certified Scrum Master (Scrum Alliance) | SAFe SSM | Microsoft AZ-900 | Oracle OCI Foundations

KEY AWARDS & LEADERSHIP

- Excellence in program delivery, innovation, and engineering performance across large-scale technology initiatives.
